- Fleet maintenance ● Winter maintenance
- Consultancy, advisory and project management services

## Who we are

As an environmental services teckal company operating across 1200 square miles of Gloucestershire and West Oxfordshire, our purpose is to keep spaces and places clean and green for every resident, visitor, town, village and community.

We appreciate the demands and challenges local authorities face so driving continuous service improvement and value for money is at the core of our business philosophy. Through networking with commissioning organisations we ensure we have a clear understanding of corporate, political and budgetary priorities and therefore understand and deliver against customer needs, whilst keeping costs low.

Our unique position as a multi-shareholder teckal company, our experience of delivering high profile environmental services, and our ambitious plans for commercialisation allow Ubico to work collaboratively with local authorities and advise clients and partners on:

01 Options appraisals for insourcing/the creation of Local Authority Trading Companies (LATC's)

02 Governance

03 Mobilisation of LATC's

04 Risks and Financial Modelling

05 Commercialisation

## Consultancy, Advisory and Project Management Services

Since Ubico was formed in 2011 we have achieved success, grown quickly, and faced the many challenges of expansion. We have built a company with a proven model that has delivered efficiencies and surpluses back to our shareholders.

With Ubico's experience and expertise, local authorities can be confident that they are implementing a business model that future proofs public service delivery.
